

### Fully Insured Mental Health Parity NQTL Analysis

The analysis below explains how Aetna’s various clinical management and network development policies, procedures, and practices comply with the non-quantitative treatment limitation (NQTL) requirements of the Mental Health Parity and Addiction Equity Act (“MHPAEA”). The analysis includes links to publicly available information concerning clinical policy and procedure including medical management, i.e.) medical necessity criteria and utilization management criteria as well as network development standards and procedures. This analysis is reviewed and updated periodically, but not less than annually. This analysis follows the NQTL analytical framework prescribed by federal MHPAEA regulators (i.e. “factors” and “sources”).

There is a variety of information discussed in the comparability analysis below that is memorialized in greater detail in various policies, procedures, reports, and other documents (“Supplemental Information”). Such Supplemental Information is available for your review upon request.

#### **Non-quantitative Treatment Limitations (NQTLs)**

In accordance with state and federal law, Aetna’s plans comply with the nonquantitative treatment limitation requirements of the Mental Health Parity and Addiction Equity Act (“MHPAEA”). Aetna utilizes comparable processes, strategies, evidentiary standards, and other factors to determine NQTL requirements, including medical management review requirements such as precertification, for all plan benefits, including behavioral health, substance use disorder, medical, and surgical treatments. Moreover, these determinants are applied equally and no more stringently to behavioral health and substance use disorder benefits than they are applied to medical and surgical benefits. More information on Aetna’s compliance with regard to the particular types of NQTLs is set forth below.

Note –“Processes”, “strategies”, “evidentiary standards”, and “other factors” are terms of equivalence; none of which have to be individually articulated in order to be sufficient NQTL analysis. A plain reading interpretation of the MHPAEA Final Rule makes it clear that “any (emphasis added) processes, strategies, evidentiary standards, or other factors” used in applying the MH/SUD NQTL can be compared to any process, strategy, evidentiary standard, or other factors used in applying the medical/surgical NQTL for the purposes of comparability and stringency analysis. See 29 CFR 2590.712(c)(4). Therefore, throughout a portion of these answers you will see content populated as both a process, strategy, or evidentiary standard—some of which may be supported qualitatively or some of which may be supported quantitatively (e.g. “cost” as a factor to add a service to the NPL).

## Service Definitions

**In Network Inpatient (IP):** Acute medical, psychiatric or substance use disorder services requiring an overnight stay at a designated place of service and within a network of providers established or recognized under a plan.

**Out of Network Inpatient (IP):** Acute medical, psychiatric or substance use disorder services requiring an overnight stay at a designated place of service by providers that do not participate in Aetna's network.

**In Network Outpatient Office Visit (OP OV):** Refers to services provided by a healthcare professional in such a manner that the predominant trait of the outpatient services is direct, personal interaction with the professional. Such interactions typically, but not exclusively, occur in a healthcare professional's office, with limited reliance on technological interventions and within a network of providers established or recognized under a plan.

**Out of Network Outpatient Office Visit (OP OV):** Refers to services provided by a healthcare professional in such a manner that the predominant trait of the outpatient services is direct, personal interaction with the professional. Such interactions typically, but not exclusively, occur in a healthcare professional's office, with limited reliance on technological interventions, and are delivered by providers that do not participate in Aetna's network.

**In Network Outpatient All Other (OP AO):** Refers to outpatient services provided by a healthcare professional in a manner that the predominant trait of the outpatient service is something other than direct, personal interaction with the professional. Examples include outpatient services that are primarily dependent on a technological test or device, that are characterized by some type of physical intervention (e.g., a surgery or other procedure), or where services are provided as part of an integrated program. Outpatient services in the "other" sub-classification may be delivered in a variety of settings, including a healthcare facility, the community and or the home and are provided within a network of providers established or recognized under a plan.

**Out of Network Outpatient All Other (OP AO):** Refers to outpatient services provided by a healthcare professional in a manner that the predominant trait of the outpatient service is something other than direct, personal interaction with the professional. Examples include outpatient services that are primarily dependent on a technological test or device, that are characterized by some type of physical intervention (e.g., a surgery or other procedure), or where services are provided as part of an integrated program. Outpatient services in the "other" sub-classification may be delivered in a variety of settings, including a healthcare facility, the community and or the home, and are delivered by providers that do not participate in Aetna's network.

**Emergency Care:** Services provided in response to a medical emergency or urgent condition as well as emergency medical transportation.

**Prescription drugs:** Formulary brand name, formulary generic or covered non-formulary medications that require a prescription and are mailed to, delivered to, or picked up by the patient or designee.

**Medical versus MH/SUD benefits:** In keeping with MHPAEA guidance, benefits that are provided for the treatment of Mental Health/Substance Use Disorder (MH/SUD) conditions, as those conditions are defined by the most recent version of the Diagnostic and Statistical Manual (DSM), are MH/SUD benefits. All other benefits are considered medical/surgical benefits.

NQTL Applicability Summary

Non-Quantitative Treatment Limitations	Is NQTL applied to Medical/Surgical benefits?	Is NQTL applied to Mental Health/Substance Use Disorder benefits?	Is NQTL applied to In Network Inpatient classification?	Is NQTL applied to Out of Network Inpatient classification?	Is NQTL applied to In Network Outpatient classification?	Is NQTL applied to Out of Network Outpatient classification?	Is NQTL applied to Emergency classification?	Is NQTL applied to Prescription classification?	Is NQTL applied to In Network Outpatient-Office subclassification?	Is NQTL applied to Out of Network Outpatient- Office subclassification?	Is NQTL applied to In Network Outpatient-All Other subclassification?	Is NQTL applied to Out of Network Outpatient-All Other subclassification?

\*Consistent with the NQTL types identified in the Final Rules and recent guidance

## Utilization Management (UM)

### Services Subject to Precertification, Concurrent Review, or Retrospective Review

Precertification, Concurrent Review and Retrospective Review (“UM”) does not apply to any medical surgical or MH/SUD benefits in the Outpatient-Office Visit (In-network and Out of Network) Classification. UM applies to the medical/surgical benefit of Fixed-wing Aircraft Transport in the Emergency Classification. All MH/SUD and non-palliative medical/surgical benefits in the Inpatient Classification are subject to UM. UM applies to three MH/SUD Outpatient All Other benefits: Applied Behavior Analysis for a diagnosis of Autism Spectrum Disorder, Partial Hospitalization, and Transcranial Magnetic Stimulation. UM applies to numerous medical/surgical Outpatient All Other benefits (for example, Outpatient surgery, Private Duty Nursing, Proton beam Radiotherapy, and Electric or Motorized Wheelchairs and Scooters). Please refer to most up-to date Participating Provider Precertification List for Medical/Surgical services and the Behavioral Health Precertification List for MH/SUD services, which is subject to change from time to time.

See <https://www.aetna.com/health-care-professionals/precertification/precertification-lists.html>

### Factors, Sources, Methods and Stringency Precertification, Concurrent Review and Retrospective Review NQTLs

The following framework organizes the factors, sources, methods and analysis and stringency application applied to the procedures, services, devices, and therapies to which Precertification, Concurrent Review, and Retrospective Review NQTLs apply in the Outpatient-All Other benefit classification for in-network and out-of-network (INN, OON) A detailed analytical framework is not provided for the Inpatient benefit classification since the Precertification, Concurrent Review, and Retrospective Review NQTLs apply to all non-palliative procedures, services, devices, and therapies in this classification for both medical/surgical and MH/SUD.

All UM factors, processes, strategies, and evidentiary standards, both MH/SUD and medical/surgical, are singularly developed in unison through the coordination efforts of the Parity Taskforce who leverages both MH/SUD and medical/surgical subject matter experts in factor development and ongoing review, and the National Precertification List (NPL) Committee—a group of clinicians and other subject matter experts representing both MH/SUD and medical/surgical expertise then applies these determinants. See Appendix 3 for a summary of Precertification Committee composition. This Precertification Committee oversees Aetna’s NPL, which physicians, hospitals and other health care professionals use for all plans to determine when medical/surgical or MH/SUD precertification is needed or required for each benefit classification for INN services.

## **Precertification**

Precertification occurs before inpatient admissions and select ambulatory procedures and outpatient services. Precertification applies to:

- Procedures and services on the Aetna Participating Provider Precertification List,
- Procedures and services on the Aetna Behavioral Health Precertification List, and
- Procedures and services that require precertification under the terms of the member's plan.

Please refer to most up-to date Precertification List for Medical/Surgical services and the Behavioral Health Precertification List for MH/SUD services, which is subject to change from time to time. See <https://www.aetna.com/health-care-professionals/precertification/precertification-lists.html>

### **Analysis for the Addition of a Service to the NPL:**

#### **\*PRECERTIFICATION FACTOR LIST APPLICABLE TO BOTH MEDICAL/SURGICAL AND MH/SUD BENEFITS:**

1. All medical/surgical and MH/SUD procedures, services, devices, and therapies subject to the precertification NQTL must meet one or more of the following review methodologies specific to each of the identified factors:
  - a. Cost-- Cost of treatment is satisfied when the average paid Medicare rate was at least \$150 for the service being considered (based on Aetna's national paid Medicare claims experience)
  - b. High cost growth -- whether, based on internal Aetna claims data, the per member per month expense for the services increased more than 10% in the most recent two-year period compared to an initial year baseline (for example, if the 2015 PMPM=\$1.00, the 2016 PMPM=\$2.00, and the 2017 PMPM=\$3.00, then that would be a 200% trend increase over the two-year period - calculate by subtracting the 2015 PMPM from the 2017 PMPM and then divide by the 2015 PMPM)
  - c. Variability in cost and practice is satisfied when internal claims data demonstrates that there is greater than three-fold variability in cost per unit, overall length of treatment, or overall number of services per treatment for the procedure, service, device, or therapy in the most recent 12-month period AND

All medical/surgical and MH/SUD procedures, services, devices, and therapies subject to the precertification NQTL must meet both of the following review methodologies specific to each of the identified factors

2. There must be at least one evidenced-based criteria (EBC) available to assist clinicians with precertification decisions. EBC may be sourced from national medical professional organizations, evidence-based evaluations by consensus panels and technology evaluation bodies, or criteria from professional associations AND
3. Administrative inability to apply Claims Rules (Claims Rules are automated claims system controls that decide if coverage criteria is met). A procedure, drug or technology cannot feasibly be managed by Claim Rules alone due to either subjectivity or complexity of criteria

\*Note--as part of the intake completed for new services being added to the NPL, generally a forecasted ROI is produced (and such requirement is noted in the intake instructions). Such forecasted ROI helps mitigate the risk of a service satisfying the initial inclusion factors in year one but failing the retention framework in subsequent years. It is important to note that for both

the inclusion framework or retention framework for the NPL all factors are equally applicable to the consideration of a medical/surgical service or MH/SUD service such that the in-writing component of parity is satisfied.

**Analysis for the Retention of a Service to the NPL:**

- After the first year and annually thereafter, the ROI is calculated, and a decision is made to retain or remove from the NPL primarily based on the following:
    - ROI 3:1 or greater - retain
    - ROI 2 to 2.9:1 – NPL committee discussion of extenuating factors (see below)
    - ROI  $\leq$  1.9:1 and NOT integral to NPL Group/Category (example, breast reduction code may independently have a low ROI, but it is part of a procedure group for which precertification is required) - committee discussion of extenuating factors (see below)
- \* While ROI may be the primary factor used to determine retention of a service on the NPL, the NPL Committee may consider additional factors that concern the NPL Committee which are unrelated to medical cost (e.g. incorrect utilization, or need to retain services on list to make coverage determinations consistent with Aetna's Clinical Policy Bulletins)

- Extenuating factors:

Extenuating factors are qualitative or quantitative points of consideration that, based on the expertise of Aetna's NPL Committee, warrant additional consideration (beyond the ROI) in connection with the retention or removal of a service from the NPL. Such extenuating factors may include High-cost growth (as calculated using the methodology described in the inclusion section above), variability in practice or cost (as calculated using the methodology described in the inclusion section above), Safety, incidence of occurrence, incorrect utilization, consistency with Aetna's Clinical Policy Bulletins, and End-to-end staff and system support for efficient management.

INN Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>

## **Concurrent Review**

Concurrent review is a utilization review service performed by licensed healthcare professionals to evaluate the patient's care while in the hospital or while undergoing outpatient treatment. The intent is to determine medical necessity and appropriateness of treatment, assess appropriateness of level of care and treatment setting, determine benefits and eligibility identify the patient's discharge and continuing care plan, and identify and refer potential quality of care and patient safety concerns for additional review.

All inpatient services, whether MH/SUD or medical/surgical, are subject to Concurrent Review; as such comparability analysis is not required for the Inpatient INN and OON classifications. Concurrent Review in the Outpatient-All Other INN and OON classifications, as further described below, is conducted for services listed on the National Precertification List or member precertification list (for OON) and for MH/SUD services on the Behavioral Health Precertification list or member precertification list. (See link for current precertification list: <https://www.aetna.com/health-care-professionals/precertification/precertification-lists.html>). Concurrent Review involves a review for continued medical necessity for dates of service beyond the initial precertification authorization and occurs with subsequent coverage requests so that no gaps in the authorization exist.

This means that staff reviews all dates of service that do not have a coverage determination with a subsequent request for an extension of services. The Concurrent Review process includes a review for medical necessity and for the appropriate level of care that meets the member's clinical needs. We use standardized clinical guidelines, monitor the member's progress, review for potential quality of care concerns, and ensure there is an adequate discharge plan in place. If medical necessity is not evident, the case is sent for review to a medical director who may call the attending physician for additional information before rendering a coverage determination. For medical/surgical care, additional units (e.g. days, sessions) of care are authorized based on the individual needs of the member (i.e. clinical judgement based on complexity and severity) guided by care guidelines (which in many cases prescribe care pathways, treatments and lengths of stay), by facility contract, and clinical criteria. For MH/SUD, clinical judgment guided by clinical criteria dictates the number of additional units of care that are authorized.

MH/SUD's use of clinical judgment guided by clinical criteria as the sole process/strategy for determinations of additional units of care authorized exceeds the expectations of "comparability" under NQTL testing. Clinical judgement, when applied with the appropriate stringency controls discussed below, is a strategy that is more favorable to members. The medical/surgical utilization management team similarly uses clinical judgement as a process/strategy; however, clinical judgement is further constrained by facility contract, and care guidelines (which in many cases prescribe care pathways, treatments and lengths of stay). For both BH and medical/surgical, "severity" and "complexity", as used within our UM policies, are determined primarily based on the clinical judgement of expert reviewers and informed by the member's medical history, clinician progress notes, and discharge plans.

Aetna relies on the following processes and strategies to ensure clinical judgement remains a process/strategy that exceeds the minimum requirements of Parity for MH/SUD concurrent review frequency determinations: comparison of denial rates and average length of stay, Internal Quality Reviews (IQR) and Inter-Rater Reliability (IRR) assessments, NCQA Health Plan Accreditation, and peer-to-peer clinical review.

It should be noted that Aetna's book of business comparative analysis of UM denials rates and average length of stays demonstrate that on scale, MH/SUD benefits historically have significantly fewer denials per 1,000 admissions and longer average lengths of stays than medical surgical comparable benefits.

Regarding IQR and IRR review, among other things, the intent is to identify both strengths and opportunities for improvement in the delivery of UM services, and to measure compliance with National Committee of Quality Assurance (NCQA) File Review standards (which evaluate both BH and medical surgical UM practice and are designated as "must pass" for recertification). A

random sample of UM denials, which includes all lines of business and product types, is conducted periodically. The goal for each audit is an aggregate audit score of at least 95%. An NCQA File Review tool is used to complete the audits. Quantitative and qualitative feedback is provided by the audit process to individual UM reviewers.

The Medical Director Internal Quality Review is a process for re-adjudication of a claim in situations where a Senior Medical Director (SMD) or Medical Director (MD) auditor disagrees with a medical necessity determination made by a Medical Director (MD) and/or Physician Advisor (PA) and/or Clinician Advisor (CA).

Aetna’s Peer-to-peer review process seeks to decrease the risk of inconsistencies in the operationalization of UM policies by allowing a treating practitioner, a clinician on behalf of the treating practitioner or a facility designated physician to discuss a clinical denial of coverage determination with a peer reviewer or behavioral health consultant psychiatrist/psychologist to mitigate the risk of operational disparities based on differences in the quantity/quality of written documentation the treating practitioner may provide.

Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>

**Retrospective Review**

Retrospective review is a utilization review service performed by licensed healthcare professionals to determine coverage after treatment has been given. The intent is to determine medical necessity, appropriateness of treatment, and determine benefits and eligibility. Retrospective review is utilized for OON Inpatient services that were not pre-certified and OON Outpatient All-Other services that are on the member precertification list and were not precertified. Retrospective Review is only used In Network for emergency inpatient admissions for participating facilities that have a deviation for late notification on the Late Notification Deviation list or a facility that is on the Internal or External Disaster Deviation List. The Late Notification Deviation list is a list of participating facilities that as part of their vendor contract they are eligible for retro review for emergent admits when they fail to notify us on the front end. The Internal and External disaster list is when there are disasters in certain States, such as hurricanes, that the facilities are allowed to request retro review for the specific timeframes noted on the deviation list since the facilities are not required to notify us on the front end. Both such lists are a benefit to in-network providers as the failure to precertify services generally results in an administrative denial with no recourse for the facility to balance bill the member.

Additional UM Analysis		
Item	Medical/Surgical	MH/SUD
Denial Rate & Average Length of Stay (ALOS) Stringency Analysis	See Appendix 7 2021 MHP Utilization Report	
Who is responsible for UM reviews and general UM review process	<p>An initial clinician reviewer (most commonly a registered nurse for med/surg cases or a licensed clinical social worker or licensed professional counselor for MH/SUD) initially reviews authorization requests. These clinicians are appropriately-licensed.</p> <p>If the initial clinician reviewer determines the documentation submitted supports that the patient meets established clinical criteria for the requested service, an approval (authorization) is entered in Utilization Management system, so that when the reimbursement claim is submitted, the claim processor knows the service was approved.</p> <p>If the initial clinician reviewer does not believe the documentation provided establishes that the patient and proposed service meet established clinical criteria, the clinician reviewer sends the review/denial to an Aetna Medical Director for confirmation and a final coverage determination. The Medical Director reviews:</p> <ul style="list-style-type: none"> <li>• Documentation provided by the member/patient's provider</li> <li>• Clinician reviewer's findings</li> <li>• Aetna's clinical criteria (e.g. CPB, MCG, LOCUS, CAOCUS)</li> </ul> <p>While initial approval of services may be made by clinician reviewers, all denials must be decided by a physician, pharmacist, dentist, oral and maxillofacial surgeon, psychiatrist/psychologist/BCBA-D, depending on the type of services involved (see NCS 503-01). Both licensed staff clinicians (e.g., nurses) and physician reviewers have comparable experience in their respective specialties (see NCS 503-1). A denial is communicated in writing, along with options for appealing the denial and seeking peer-to-peer review. The process for review and the burdens of review for MH/SUD services is the same as for review of medical/surgical services.</p>	
Degree of Discretion	We apply the appropriate clinical criteria/guidelines and <u>clinical judgment</u> to the coverage determination. We allow discretion for making authorization decisions based on the professional scope of practice and clinical experience. See stringency controls above in support of the case that discretion does not arbitrarily disadvantage BH/SUD benefits.	
UM documentation requirements for MH/SUD and M/S	<p>Documentation requirements: NCS 503 – Medical Review:</p> <p><b>“F. Required Documentation:</b></p> <p>The applicable UM system documentation includes member demographics and information supporting clinical and benefit coverage determinations.</p>	

	<p>Staff includes the following documentation elements in the applicable UM system to support the coverage determination process:</p> <ul style="list-style-type: none"><li>• The requested procedure/service/level of care.</li><li>• The method of receipt (e.g., telephone, fax, e-mail, voice mail, on-site review), and the date of receipt;</li><li>• The specific clinical criteria/guidelines (including number, edition and name) used in decision making (e.g., MCG 22nd edition, M-70 Cellulitis; CPB # 0050: Varicose Veins; LOCUS, V5, RTC);</li><li>• A determination as to whether clinical criteria/guidelines are met; and,</li><li>• The disposition of all material submitted as part of the coverage determination process (e.g., shredding of duplicate provider medical records when applicable after a coverage determination, backend imaging for unique documents).</li></ul> <p>Documentation for all coverage determinations (approvals and denials) requires all of the elements noted above as well as the following:</p> <ul style="list-style-type: none"><li>• Date and time of the review (if different from the date and time of the system entry);</li><li>• Name, title (if applicable) and the department/location (e.g., facility discharge planning department, PCP office) providing the information;</li><li>• Relevant benefit limitations and the number of days, visits, services authorized through the current date, if applicable;</li><li>• Pertinent clinical information to support coverage for the service or to substantiate the coverage denial determination;</li><li>• Clinical criteria, guidelines, and/or other decision support tool(s) used in decision making including:<ul style="list-style-type: none"><li>• The specific criteria, guideline, standard met/not met;</li><li>• Clear and specific documentation of the rationale used to make the coverage decision.</li></ul></li><li>• Coverage determination (e.g., approved, referred, or denied);</li><li>• Notation of a same or similar specialty matched review (as appropriate) if conducted during the coverage determination process.</li></ul>
--	---

## Medical Necessity

### Medical Necessity NQTL Analysis

Medically necessary means healthcare services provided for the purpose of preventing, evaluating, diagnosing or treating a sickness, injury, mental illness, substance use disorder, condition, disease or its symptoms that are all of the following as determined by Aetna or its designee, within Aetna's sole discretion. The services must be:

- in accordance with Generally Accepted Standards of Medical Practice;
- clinically appropriate, in terms of type, frequency, extent, site and duration, and considered effective for your sickness, injury, mental illness, substance use disorder disease or its symptoms;
- not mainly for your convenience or that of your doctor or other health care provider; and
- not more costly than an alternative drug, service(s) or supply that is at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of your Sickness, Injury, disease or symptoms.

*Generally Accepted Standards of Medical Practice* are standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, relying primarily on controlled clinical trials, or, if not available, observational studies from more than one institution that suggest a causal relationship between the service or treatment and health outcomes.

If no credible scientific evidence is available, then standards that are based on Physician specialty society recommendations or professional standards of care may be considered. Aetna reserves the right to consult expert opinion in determining whether health care services are Medically Necessary. The decision to apply Physician specialty society recommendations, the choice of expert and the determination of when to use any such expert opinion, shall be within Aetna's sole discretion.

Aetna develops and maintains clinical policies that describe the Generally Accepted Standards of Medical Practice scientific evidence, prevailing medical standards and clinical guidelines supporting its determinations regarding specific services. These clinical policies as developed by Aetna are revised from time to time. Aetna publishes information concerning utilization review and our medical necessity criteria here: <https://www.aetna.com/health-care-professionals/utilization-management.html>

Within that site, there is a section dedicated specially to the criteria used for behavioral health conditions (i.e., LOCUS/CALOCUS, ABA and ASAM), which can be found here: <https://www.aetna.com/health-care-professionals/patient-care-programs/locat-aba-guidelines.html>.

We also publish clinical policy bulletins concerning services we may or may not cover, including behavioral health services that may be excluded on grounds that they are experimental and investigational, which detail the evidentiary bases for our coverage or exclusion determinations: <https://www.aetna.com/health-care-professionals/clinical-policy-bulletins.html>

Services/ procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Medical/ Surgical	MH/ SUD				
All inpatient, outpatient, and emergency care services		Medical necessity applies to all medical/surgical and mental health/substance use disorder benefits in each MHPAEA category and is based on generally accepted standards of care, as further detailed herein.	<p>The processes, strategies, and evidentiary standards include:</p> <p>MHPAEA provides that a plan may develop medical policies that limit care for mental health/substance use disorder benefits based on medical necessity as long as it does so for medical/surgical benefits and the “evidentiary standards are applied in a manner that is based on clinically appropriate standards of care for a condition”. 45 CFR 146.136(c)(4)(iii) (Example 4)</p> <ul style="list-style-type: none"> <li>• Evidence in the peer-reviewed published medical literature,</li> <li>• Evidence-based consensus statements, expert opinions of healthcare providers</li> <li>• Evidence-based guidelines from nationally recognized professional healthcare organizations and public health agencies.</li> <li>• Technology assessments and structured evidence reviews</li> <li>• Review of generally accepted national evidence-based guidelines from national medical professional organizations, evidence-based evaluations by consensus panels, and technology evaluation bodies or criteria from professional associations such as:</li> </ul>	<p>Aetna’s strategy regarding satisfaction of parity’s NQTL requirements includes the utilization of an identical standard/definition of medical necessity.</p> <p>Medical and BH utilize appropriately applicable and generally accepted standards of practice to guide clinician with coverage determinations.</p> <p>For substance use disorder treatments, Aetna utilizes criteria developed by the American Society of Addiction Medicine (or ASAM) as a guideline to determine medical necessity. Every individual MH/SUD medical necessity determination is afforded independent clinical consideration based on the member’s presentation. This point is made clear to Aetna clinicians making medical necessity determinations in both the medical necessity tools utilized and in staff training. More information about LOCUS, CALOCUS/CASSII and ASAM criteria can be found on Aetna’s website at <a href="https://www.aetna.com/health-care-professionals/patient-care-programs/locat-aba-guidelines.html">https://www.aetna.com/health-care-professionals/patient-care-programs/locat-aba-guidelines.html</a>.</p> <p>For medical treatments Aetna utilizes Milliman Care Guidelines (MCG) as a guideline to determine the medical necessity.</p>	<p><b>As Written:</b> the definition of “medical necessity” for both MH/SUD and medical/surgical share the same definition in our standard Certificates of coverage. Additionally, the Clinical Policy Bulletins (CPB) and evidence-based guidelines used in the medical necessity review process have been found to be aligned to generally accepted practice standards. This validation is completed by our Clinical Policy Council (see Appendix 2 for Council composition) and approval by our chief medical officer or their designee. This process involves annual review of generally accepted national evidence-based guidelines.</p> <p><b>In Operation:</b> Aetna monitors the application of the medical necessity NQTL as follows:</p> <p>See In operations analysis for precertification as medical necessity is a component of the utilization review process.</p> <p>Further detail on the criteria:</p> <p>LOCUS/CALOCUS</p> <p>Aetna utilizes LOCUS and CALOCUS, which nationally is recognized (by several courts, regulators, and various external stakeholders) as a generally accepted standard of care tool, to guide clinicians in</p>

		<ul style="list-style-type: none"> <li>- Centers for Medicare &amp; Medicaid Services (CMS) National Coverage Determinations (NCDs), Local Coverage Determinations (LCDs), and Medicare Benefit Policy Manual</li> <li>- MCG guidelines</li> <li>- American Society of Addiction Medicine (ASAM) Criteria; Treatment Criteria for Addictive, Substance-Related, and Co-Occurring Conditions, Third Edition</li> <li>- Applied Behavior Analysis Medical Necessity Guide</li> <li>- InterQual guidelines (as required by contractual provisions)</li> <li>- Level of Care Utilization System (LOCUS) for adults 18 years old and above and the Child and Adolescent Level of Care Utilization System/Child and Adolescent Service Intensity Instrument (CALOCUS/CASII)</li> <li>-</li> </ul> <p>Review of generally accepted national quality standards, i.e.) National Committee for Quality Assurance, NQCA</p> <p>These processes, strategies, and evidentiary standards: are represented in Aetna Clinical Polices and in our published Aetna Clinical Policy Bulletins (CPBs)  <a href="https://www.aetna.com/health-care-professionals/clinical-policy-bulletins.html">https://www.aetna.com/health-care-professionals/clinical-policy-bulletins.html</a></p> <p>In determining whether a medical technology is medically necessary and established, the</p>		<p>the making medically necessary level of care determinations for our Aetna members.</p> <p>The Level of Care Utilization System (LOCUS) assessment was developed to help determine the resource intensity needs of individuals who receive adult mental health services. The LOCUS was developed by the American Association of Community Psychiatrists (AAPC) in 1996. The LOCUS provides a system for assessment of needs based on 6 evaluation parameters:</p> <ul style="list-style-type: none"> <li>• Risk of harm</li> <li>• Functional status</li> <li>• Medical, addictive &amp; psychiatric co-morbidity</li> <li>• Recovery Environment</li> <li>• Treatment and recovery history</li> <li>• Engagement and recovery status</li> </ul> <p>The LOCUS assessment is reviewed and updated annually. There are multiple venues for regular input from all users as well as processes for continuous review and update of the tools themselves based on this input. Venues include:</p> <ul style="list-style-type: none"> <li>• National Council for Community Behavioral Healthcare/AACP LOCUS Advisory Committee</li> <li>• Deerfield Solutions</li> </ul>
--	--	---	--	--

		<p>Clinical Policy Council will consider whether the following five criteria are met:</p> <ul style="list-style-type: none"> <li>• Whether the medical technology has final approval from the appropriate governmental regulatory bodies</li> <li>• Whether the scientific evidence permits conclusions about the effect of the medical technology on health outcomes</li> <li>• Whether the medical technology improves net health outcomes</li> <li>• Whether the medical technology is at least as beneficial as any established alternatives</li> <li>• Whether the medical technology is more costly (taking into account all health expenses incurred in connection with the medical technology) than any equally effective established alternatives</li> </ul>		<ul style="list-style-type: none"> <li>• AACP/AACAP Committee for CALOCUS/CASII</li> </ul> <p>AACP Board of Directors Products and Service Plank</p> <p>CALOCUS/CASII</p> <p>The Child and Adolescent Level of Care Utilization System/Child and Adolescent Service Intensity Instrument (CALOCUS/CASII) assessment provides a framework for defining the appropriate character and intensity of both services and resources to meet the needs of children and adolescents . CALOCUS/CASII was developed by the American Association of Community Psychiatrists in collaboration with the American Association of Child and Adolescent Psychiatry and closely mirrors the structure of the LOCUS.</p> <p>The CALOCUS/CASI provides a system for assessment of needs based on 6 evaluation parameters:</p> <ul style="list-style-type: none"> <li>• Risk of harm</li> <li>• Functional status</li> <li>• Co-Occurrence of Conditions: medical, substance use, developmental and psychiatric</li> <li>• Environmental stress</li> <li>• Environmental support</li> <li>• Resilience and/or Response to Services</li> </ul>
--	--	---	--	--

				<ul style="list-style-type: none"> <li>○ Child and Adolescent Engagement in Service</li> <li>○ Parent/Primary Caregiver Engagement in Services</li> </ul> <p>Similar to the LOCUS assessment, the CALOCUS/CASII assessment is reviewed and updated annually. There are multiple venues for regular input from all users as well as processes for continuous review and update of the tools themselves based on this input. Venues include:</p> <ul style="list-style-type: none"> <li>• National Council for Community Behavioral Healthcare/AACP LOCUS Advisory Committee</li> <li>• Deerfield Solutions</li> <li>• AACP/AACAP Committee for CALOCUS/CASII</li> <li>• AACP Board of Directors Products and Services Plank</li> </ul> <p>ASAM For members seeking treatment for substance use disorders, Aetna utilizes the American Society of Addiction Medicine Criteria. The ASAM Criteria provides guidelines for evaluating the medical necessity of levels and types of care for substance use disorders. Many Courts and regulators consider ASAM a generally accepted, national standard for SUD treatment decisions. Some states, notably New York, New Jersey and Texas, require</p>
--	--	--	--	---

				<p>state-specific SUD level of care criteria. In those states, we use the criteria required by law. ASAM revises its criteria from time to time in keeping with its established best practices. Such practices can be found at <a href="https://www.asam.org/resources/the-asam-criteria/about">https://www.asam.org/resources/the-asam-criteria/about</a>. Currently, Aetna is using the most recent version of the ASAM guidelines.</p> <p>MCG For medical/surgical health treatments, Aetna utilizes Milliman Care Guidelines, which nationally is a generally accepted standard of care tool, to guideline to clinicians in the making medically necessary level of care determinations for our Aetna members.</p> <p>Clinical Policy Bulletins (CPBs)</p> <p>The Aetna Clinical Policy Council evaluates the safety, effectiveness and appropriateness of medical technologies (e.g., drugs, devices, medical and surgical procedures used in medical care, and the organizational and supportive systems within which such care is provided) that are covered under Aetna medical plans, or that may be eligible for coverage under Aetna medical plans. In making this determination, the Clinical Policy Council will review and evaluate evidence in the peer-reviewed published medical literature, information from the U.S. Food and Drug Administration and other Federal public health agencies, evidence-based guidelines from national medical professional organizations, and evidence-based</p>
--	--	--	--	---

				<p>evaluations by consensus panels and technology evaluation bodies.</p> <p>The Clinical Policy council is comprised of pharmacists and medical directors from the Medical Policy Administration (MPA) department, National Accounts department, Behavioral Health department, Clinical Pharmacy department and regional Patient Management units. The Clinical Policy council usually convenes twice monthly.</p> <ul style="list-style-type: none"> <li>• Both new and revised CPB drafts undergo a comprehensive review process. This includes review by our Clinical Policy Council and external practicing clinicians, and approval by our chief medical officer or their designee.</li> <li>• Drafts of new and revised CPBs are distributed for review to members of the Clinical Policy Council prior to each meeting. Each new and revised draft CPB is placed on the Clinical Policy Council agenda and is discussed during the meeting. The Clinical Policy Council votes whether or not to recommend approval of each draft CPB. In addition, the Clinical Policy Council may recommend other revisions to a draft CPB.</li> <li>• The CPB draft may be revised based on the Clinical Policy Council's recommendations. CPB drafts are reviewed by our Legal department and the head of the Medical Policy Administration department, and further revisions to draft CPBs may be made based on their recommendations. Draft CPBs are sent to the chief medical officer</li> </ul>
--	--	--	--	---

				<p>or their designee for review and final approval. Draft CPBs that are approved by the chief medical officer or their designee will be published on our websites within 60 days of the Clinical Policy council's recommendations.</p> <ul style="list-style-type: none"> <li>• CPBs are reviewed annually unless relevant new medical literature, guidelines, regulatory actions, or other relevant new information warrants more frequent review. Each time a CPB is updated, a comprehensive search of the peer-reviewed published medical literature is performed to determine if there is a change in the experimental and investigational status or medical necessity of medical technologies addressed in each CPB. If the Clinical Policy unit determines that new evidence or other information has emerged to warrant consideration of a change in our clinical policy, a revised CPB is prepared. If no new evidence has emerged that would warrant a change in position, the CPB may be updated with additional supporting background information and references. Each revised and updated CPB is submitted to the Clinical Policy Council for review and approval.</li> <li>• In developing our CPBs, for each medical technology selected for evaluation, the Clinical Policy unit conducts a comprehensive search of the peer-reviewed published medical literature indexed in the National Library of Medicine PubMed Database, assesses the regulatory status of the technology,</li> </ul>
--	--	--	--	--

				<p>reviews relevant evidence-based clinical practice guidelines and related documents indexed in the Agency for Healthcare Research and Quality (AHRQ) National Guideline Clearinghouse Database, and reviews relevant technology assessments indexed in the National Library of Medicine’s Health Services/Technology Assessment Text (HSTAT) Database. Also, the opinions of relevant experts may be obtained where necessary.</p> <ul style="list-style-type: none"><li>• Each CPB includes a policy statement and references to the medical literature and other sources used in developing the clinical policy. In addition, the CPB may include a background section that describes the medical technology and provides the rationale for our policy.</li><li>• In addition, each CPB has a coding section that provides applicable International Classification of Diseases (ICD), Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) codes.</li></ul>
--	--	--	--	---

## Sequenced Treatment

Sequenced treatment generally refers to application of evidenced based guidelines that recommend use of the most effective forms of treatment first, moving to less effective ones if the highest rated treatments are not working for a specific patient. Certain BH and medical/surgical services (detailed below) are subject to sequenced treatment protocols as part of the medical necessity review.

Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Medical/Surgical	MH/SUD				
See List below	Transcranial Magnetic Stimulation  Gender reassignment	<p>Note: <b>all factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Treatment efficacy based on evidence-based criteria (EBC). Evidenced based medicine is an approach to medical practice intended to optimize decision making by emphasizing the use of evidence from well- designed and well conducted research.</li> <li>There must be at least one EBC tool available to assist clinicians with determinations related to sequenced treatment use. EBC may be sourced from (as noted above) national medical professional organizations, evidence-based evaluations by consensus panels and technology evaluation bodies or criteria from professional associations.</li> </ul>	<p>Evidence based guidelines and or criteria exist for all medical/surgical and MH/SUD uses of sequenced treatment.</p> <ul style="list-style-type: none"> <li>Availability of EBC exist for all of these services via Aetna Clinical Policy Bulletins (CPBs) CPB numbers for the one BH/SUD sequenced treatment noted and for all of the Medical Surgical sequenced treatments listed are noted and are available publicly at: <a href="http://aetna.com/health-care-professionals/clinical-policy-bulletins.html">aetna.com/health-care-professionals/clinical-policy-bulletins.html</a> and are noted below</li> <li>Review of generally accepted national evidence-based guidelines from national medical professional organizations, evidence-based evaluations by consensus panels, and technology evaluation bodies or criteria from professional associations including: the NIMH sequenced treatment alternatives to relieve Depression (STAR*D Study), and an American Psychiatric Association (APA) practice guideline on major depression (2010, reaffirmed 2015).</li> </ul>	<p>Confirmation of evidence-based guidelines and criteria found in the specified CPBs for all Medical Surgical and MH/SUD procedures, services, devices and therapies including sequenced treatment and review of those guidelines demonstrates that a consistent methodology, which is aligned to generally accepted practice standards, was applied to the development of this NQTL. The MH/SUD benefits for which sequenced treatment requirements apply are no more stringent than those applied to medical surgical benefits</p>	<p><b>As Written:</b> The Clinical Policy Bulletin (CPB) evidence-based guidelines used in the sequenced treatment requirements for medical surgical back pain invasive procedures, spinal surgery, total hip replacement, obesity surgery, Vagus Nerve Stimulation, Spinal Cord Stimulation, Deep Brain Stimulation, Urinary incontinence procedures as well as those used for gender reassignment and TMS undergo a comprehensive review process and have been found to be aligned to generally accepted practice standards. This validation is completed by our Clinical Policy Council and approval by our chief medical officer or their designee. This process involves annual review of generally accepted national evidence-based guidelines.</p> <p><b>In Operation:</b> Audits demonstrating application of these sequenced treatment requirements.</p>

## Treatment Plan Requirement

A treatment plan is an individualized plan of care; where specific target behaviors are clearly defined; frequency, rate, symptom intensity or duration, or other objective measures of baseline levels are recorded, and quantifiable criteria for progress are established. Certain BH and medical/surgical services (detailed below) require the inclusion of a treatment as part of the medical necessity review.

Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Medical/Surgical	MH/SUD				
Cardiac Rehabilitation Hyperbaric Oxygen Therapy Proton Beam Therapy Physical Therapy Occupational Therapy Speech Therapy	Applied Behavior Analysis for a diagnosis of Autism Spectrum Disorder	<p>Note: <b>all factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Treatment efficacy based on evidence-based criteria (EBC). Evidenced based medicine is an approach to medical practice intended to optimize decision making by emphasizing the use of evidence from well- designed and well conducted research.</li> <li>There must be at least one EBC tool available to assist clinicians with determinations related to sequenced treatment use. EBC may be sourced from (as noted above) national medical professional organizations, evidence-based evaluations by consensus panels and technology evaluation bodies or criteria from professional associations.</li> </ul>	<p>Evidence based guidelines and or criteria exist for all medical/surgical and MH/SUD uses of treatment plans to establish medical necessity.</p> <ul style="list-style-type: none"> <li>Availability of EBC exist for all of these services via Aetna Clinical Policy Bulletins (CPBs) CPB numbers for the one BH/SUD treatment plan required service noted and for all of the Medical Surgical treatment plan required services are noted and are available publicly at : <a href="http://aetna.com/health-care-professionals/clinical-policy-bulletins.html">aetna.com/health-care-professionals/clinical-policy-bulletins.html</a> and are noted below</li> <li>Review of generally accepted national evidence-based guidelines from national medical professional organizations, evidence-based evaluations by consensus panels, and technology evaluation bodies or criteria from professional associations including:                     <ul style="list-style-type: none"> <li>-Behavior Analyst Certification Board’s Applied Behavior Analysis Treatment of Autism</li> <li>Spectrum Disorder: Practice Guidelines for Healthcare Funders and Managers</li> </ul> </li> </ul>	<p>Confirmation of evidence-based guidelines and criteria found in the specified CPBs for all Medical Surgical and MH/SUD procedures, services, devices and therapies including treatment plan requirement and review of those guidelines demonstrates that a consistent methodology, which is aligned to generally accepted practice standards, was applied to the development of this NQTL. The MH/SUD benefits for which treatment plan requirements apply are no more stringent than those applied to medical surgical benefits.</p>	<p><b>As Written:</b> The CPBs used in the Treatment Plan requirements that relates to Cardiac Rehabilitation, Proton Beam, Physical Therapy, Occupational Therapy, Speech Therapy, Hyperbaric oxygen therapy, and Applied Behavior Analysis review process have been found to be aligned to generally accepted practice standards. This validation is completed by our Clinical Policy Council and approval by our chief medical officer or their designee. This process involves annual review of generally accepted national evidence-based guidelines.</p> <p><b>In Operation:</b> Audits demonstrating application of these treatment plan requirements available upon request.</p>

## Benefit Exclusion

### Experimental or Investigational Services or Unproven Services NQTL Analysis

Medical, surgical, diagnostic, psychiatric, substance abuse or health care services, technologies, supplies, treatments, procedures, drug therapies or devices that, at the time Aetna makes a determination regarding coverage in a particular case, are determined to be any of the following:

- Not approved by the US Food and Drug Administration (FDA) to be lawfully marketed for the proposed use and not identified in the American Hospital Formulary Service or the United States Pharmacopeia Dispensing Information as appropriate for the proposed use
- Subject to review and approval by any institutional review board for the proposed use
- The subject of an ongoing clinical trial that meets the definition of a Phase 1, 2 or 3 clinical trial set forth in the FDA regulations, regardless of whether the trial is actually subject to FDA oversight.

Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Medical/Surgical	MH/ SUD				
All inpatient, outpatient, and emergency care services		<p>Factors used in the development of the experimental/investigational NQTL are listed below.</p> <p><b>Note: <u>All factors are the same for medical/surgical and MH/SUD</u></b></p> <p>Lack of appropriate evidence establishing the safety and effectiveness of the service.</p>	<p>The processes, strategies, and evidentiary standards used to define the factors include the following:</p> <ul style="list-style-type: none"> <li>• There are insufficient outcomes data available from controlled clinical trials published in the peer-reviewed literature to substantiate its safety and effectiveness for the illness or injury involved; or</li> <li>• Approval required by the FDA has not been granted for marketing; or</li> <li>• A recognized national medical or dental society or regulatory agency has determined, in writing, that it is experimental or investigational, or for research purposes; or</li> <li>• It is a type of drug, device or treatment that is the subject of a Phase I or Phase II clinical trial or the experimental or research arm of a Phase III clinical trial, using the definition of “phases” indicated in regulations and other official actions and publications of the FDA and Department of Health and Human Services; or</li> <li>• The written protocol or protocols used by the treating facility, or the protocol or protocols of any other facility, informed consent form used by the treating facility or</li> </ul>	<p>The Aetna Clinical Policy Council ongoing evaluation of Aetna’s CPBs reveals a consistent methodology of determining the experimental/investigational status of various services.</p>	<p><b>As Written:</b> The CPBs used for various Benefit Exclusion requirements have been found to be aligned to generally accepted practice standards. This validation is completed by our Clinical Policy Council and approval by our chief medical officer or their designee. This process involves annual review of generally accepted national evidence-based guidelines.</p> <p><b>In Operation:</b> Aetna monitors the application of the medical necessity NQTL as follows:</p> <p>The Clinical Policy Bulletins (CPBs) evidenced-based criteria which is used in administering various benefit exclusions.</p> <p>Exclusions, as detailed in our CPBs, undergo a comprehensive review process. This includes review by our Clinical Policy Council and external practicing clinicians, and approval by our chief medical officer or their designee. This process involves annual review of generally accepted national evidence-based guidelines as further detailed in the Medical Necessity NQTL analysis above.</p> <p>In making this determination, the Clinical Policy Council will review and evaluate evidence in the peer-reviewed published medical literature, information from the U.S. Food and Drug Administration and other Federal public health agencies, evidence-based guidelines from national medical professional</p>

Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>

			<p>by another facility studying the same drug, device, procedure, or treatment states that it is experimental or investigational, or for research purposes.</p> <ul style="list-style-type: none"> <li>Review of generally accepted national evidence-based guidelines from national medical professional organizations, evidence-based evaluations by consensus panels, and technology evaluation bodies or criteria from professional associations such as: <ul style="list-style-type: none"> <li>Centers for Medicare &amp; Medicaid Services (CMS) National Coverage Determinations (NCDs), Local Coverage Determinations (LCDs) and Medicare Benefit Policy Manual <ul style="list-style-type: none"> <li>MCG guidelines</li> </ul> </li> <li>American Society of Addiction Medicine (ASAM) Criteria; Treatment Criteria for Addictive, Substance-Related, and Co-Occurring Conditions, Third Edition</li> <li>Applied Behavior Analysis Medical Necessity Guide</li> <li>InterQual guidelines (as required by contractual provisions)</li> </ul> </li> </ul> <p>Review of generally accepted national quality standards, e.g. National Committee for Quality Assurance, NCQA</p>		<p>organizations, and evidence-based evaluations by consensus panels and technology evaluation bodies.</p> <p>The Clinical Policy council is comprised of pharmacists and medical directors from the Medical Policy Administration (MPA) department, National Accounts department, Behavioral Health department, Clinical Pharmacy department and regional Patient Management units. The Clinical Policy council usually convenes twice monthly.</p> <p>Discretion: Exclusion of experimental/investigational benefits will not apply with respect to services or supplies (other than drugs) received in connection with a disease; if Aetna determines that:</p> <ul style="list-style-type: none"> <li>The disease can be expected to cause death within one year, in the absence of effective treatment; and</li> <li>The care or treatment is effective for that disease or shows promise of being effective for that disease as demonstrated by scientific data. In making this determination, Aetna will take into account the results of a review by a panel of independent medical professionals. They will be selected by Aetna. This panel will include professionals who treat the type of disease involved.</li> <li>Also, this exclusion will not apply with respect to drugs that: have been granted treatment investigational new drug (IND)</li> </ul>

Services/procedures to which the NQTL applies		Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, strategies, evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Medical/Surgical	MH/ SUD				
			<p>These processes, strategies, and evidentiary standards: are represented in Aetna Clinical Polices and in our published Aetna Clinical Policy Bulletins (CPBs)  <a href="https://www.aetna.com/health-care-professionals/clinical-policy-bulletins.html">https://www.aetna.com/health-care-professionals/clinical-policy-bulletins.html</a></p> <p>In determining whether a medical technology is medically necessary and established, the Clinical Policy Council will consider whether the following five criteria are met:</p> <ul style="list-style-type: none"> <li>• Whether the medical technology has final approval from the appropriate governmental regulatory bodies</li> <li>• Whether the scientific evidence permits conclusions about the effect of the medical technology on health outcomes</li> <li>• Whether the medical technology improves net health outcomes</li> <li>• Whether the medical technology is at least as beneficial as any established alternatives</li> <li>• Whether the medical technology is more costly (taking into account all health expenses incurred in connection with the medical technology) than any equally effective established alternatives</li> </ul>		<p>or Group C treatment IND status; or are being studied at the Phase III level in a national clinical trial sponsored by the National Cancer Institute; if Aetna determines that available scientific evidence demonstrates that the drug is effective or shows promise of being effective for the disease.</p> <ul style="list-style-type: none"> <li>• With regard to Aetna’s Medical Technology Evaluation and Clinical Policy Development Process, Aetna’s Clinical Policy Bulletins (CPBs) previously referenced define our policy regarding the experimental and investigational status and medical necessity of medical technologies (e.g., medical and surgical procedures, devices, pharmaceuticals, biological products, behavioral health interventions, and the organizational and supportive systems within which such care is provided) that may be eligible for coverage under our medical plans. The CPBs are used in conjunction with the terms of the member’s benefit plan and other Aetna-recognized criteria to determine health care coverage for our members.</li> </ul>

## Network NQTLs

The following framework organizes the factors, sources, methods, analysis and stringency application applied to the inpatient and outpatient benefit classifications for NQTLs in the following categories: participating provider reimbursement, non-participating provider reimbursement, participating facility reimbursement, non-participating facility reimbursement, network adequacy, provider admission standards for outpatient, group and individual plans and provider admission standards for facility and facility-based practitioners.

### Participating Provider Reimbursement NQTL

Negotiated charge is the amount a network provider has agreed to accept or that we have agreed to pay them or a third party vendor (including any administrative fee in the amount paid).

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered in-network	Applies to all M/S benefits delivered in-network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Reimbursement rate indices (e.g. Medicare reimbursement rates)</li> <li>Market dynamics (e.g. supply and demand)</li> <li>Provider type (e.g. MD, NP)</li> <li>Service type (e.g. counseling, initial assessment)</li> <li>Performance based programs</li> </ul>	<ul style="list-style-type: none"> <li>Standard fee schedules:                             <ul style="list-style-type: none"> <li>Benchmarked from Medicare reimbursement rates</li> <li>Developed for each market based on market analysis</li> </ul> </li> <li>Final negotiated rate – either standard rates or a negotiated fee schedule</li> </ul>	<p>MH/SUD standard fee schedule rates can be higher but are not lower than medical rates for the same codes that can be used by BH and medical/surgical providers. The process to determine provider network reimbursement between Medical/Surgical and MH/SUD is as follows:</p> <p>Medical informs Behavioral Health that they are adjusting the standard rates for a given market. Medical supplies the new medical rates for the codes shared with the behavioral health fee schedule.</p> <p>BH will provide rates to medical for MH/SUD services in the BH Network. Behavioral Health will compare the rates to the medical rates. If the medical rate is the higher rate, Behavioral Health will adopt the medical rate. Behavioral Health will cascade the rate down to the lower level providers using the following CMS guidelines and commensurate with level of training :</p> <ul style="list-style-type: none"> <li>MD’s (MH/SUD and medical/surgical) &amp; Clinical Psychologists receive 100% of the rate</li> <li>Nurse Practitioners, Physician Assistants and Certified Nurse Specialist (MH/SUD and</li> </ul>	<p><b>As Written:</b> Aetna maintains uniform reimbursement practices that are equally applicable to MH/SUD and medical/surgical. See Appendix 1 for a listing of core policies.</p> <p><b>In Operation:</b> Aetna monitors the application of this NQTL through several initiatives:</p> <ul style="list-style-type: none"> <li>Mental Health Parity (MHP) Task Force: Multi-disciplinary team that meets monthly to establish parity compliance protocols; clarify interpretation of parity regulations, FAQs, and related requirements; and to respond to internal and external parity questions and requests. Subgroups comprised of both Behavioral Health and Medical Surgical Clinical and other administrative personnel meet more frequently and as needed to ensure compliance in specific policy and operational areas, i.e.) network management, clinical management by level of care.</li> <li>Rates are updated, and new schedules are completed and reviewed by a different person to make sure they are accurate. The rates are reviewed on both Medical and BH by members</li> </ul>

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
				<p>medical/surgical) receives 85% of the new rate**</p> <ul style="list-style-type: none"> <li>• Drug and Alcohol Counselor, Licensed Professional Counselor, Marriage and Family Therapist, Pastoral Counselor, Social Worker receives 75% of the new rate***</li> <li>• Audiologist, Registered Dietician, Genetic Counselor, Massage Therapist, Nutritionist, Respiratory Therapist receives 75% of the new rate</li> </ul> <p>** If the existing MH/SUD rate is higher than 85% of the new rate, the already existing rate stays in place                      *** If the existing MH/SUD rate is higher than the 75% of the new rate, the already existing rate stays in place</p> <p>The rates are effective at the same time as the new medical rates.</p> <p>MH/SUD rates can be updated in addition to the rate updates triggered by the Medical rate updates.</p>	<p>of the enterprise senior network team as well as by members of the senior regional market team.</p>

**Non-Participating Provider Reimbursement NQTL**

Allowable amount is the amount of an out-of-network provider’s charge that is eligible for coverage. The allowable amount depends on the geographic area where members get the service or supply.

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered out-of-network	Applies to all M/S benefits delivered out-of-network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Reasonable and Customary rates benchmarked from reimbursement rate indices</li> <li>The Centers for Medicare and Medicaid Services’ (CMS) National Correct Coding Initiative (NCCI) and other external materials that say what billing and coding practices are and are not appropriate</li> <li>Generally accepted standards of medical and dental practice</li> <li>The views of physicians and dentists practicing in the relevant clinical areas</li> <li>Aetna’s own data and/or databases and methodologies maintained by third parties.</li> </ul>	<ul style="list-style-type: none"> <li>Rate hierarchy (i.e. a preset algorithm that generates the rate that will be paid based on certain factors)</li> <li>Market analysis when rate hierarchy is not applicable</li> <li>Final rate negotiated as part of the rate hierarchy process</li> <li>Vendor contracts</li> <li>Third-party claim and code review</li> </ul>	<p>Aetna compensates nonparticipating providers based on member’s plan and benefit level subject to the lesser of either the billed charges or the allowable amount determined by a standard rate hierarchy that is the same for both MH/SUD and M/S.</p> <p>For Aetna’s standard fully insured plans, Aetna’s claim payment system follows these steps in attempting to price non-participating claims.</p> <p>If one step is unsuccessful, we move on to the next until the claim is successfully priced. These steps may vary by type of non-participating claim.</p> <p>First tier of hierarchy includes Single-case contracting (pre-service negotiations), second tier includes availability of a National Advantage Program (NAP) rate, third tier includes the Plan rate, fourth tier includes facility charge review, fifth tier includes ad hoc NAP post-service negotiations, and sixth tier involves non-par reasonable/default rate.</p> <p>Where reimbursement is based on Aetna’s OON schedules then:</p> <ul style="list-style-type: none"> <li>MD’s (MH/SUD and medical/surgical) &amp; Clinical Psychologists receive 100% of the rate</li> <li>All other provider types receives 85% of the new rate</li> </ul>	<p><b>As Written:</b> Aetna maintains uniform reimbursement practices that are equally applicable to MH/SUD and medical/surgical. See Appendix 1 for a listing of core policies.</p> <p><b>In Operation:</b> Aetna monitors the application of this NQTL through:</p> <ul style="list-style-type: none"> <li>Mental Health (MHP) Task Force: Multi-disciplinary team that meets monthly to establish parity compliance protocols; clarify interpretation of parity regulations, FAQs, and related requirements; and to respond to internal and external parity questions and requests. Subgroups comprised of both Behavioral Health and Medical Surgical Clinical and other administrative personnel meet more frequently and as needed to ensure compliance in specific policy and operational areas, i.e.) network management, clinical management by level of care.</li> </ul>

Participating Facility Reimbursement NQTL

Negotiated charge is the amount a network provider has agreed to accept or that we have agreed to pay them or a third party vendor (including any administrative fee in the amount paid).

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered in-network	Applies to all M/S benefits delivered in-network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>market dynamics (e.g. supply and demand, volume with Aetna)</li> <li>Performance based programs</li> <li>Scope and complexity of services provided</li> <li>Aetna membership presence within region</li> </ul>	<ul style="list-style-type: none"> <li>Benchmarked from Medicare Inpatient Psychiatric Facility Prospective Payment System</li> <li>Market analysis</li> <li>Negotiated reimbursement models (e.g. per diem versus DRG)</li> <li>Final rate negotiated from standard target ranges</li> </ul>	<p>Prior to negotiating such rates with a particular facility provider, Aetna has developed a set of standard target rates based on the average rates paid for similar services in a particular market. These target rates are updated annually based on average rate increases.</p> <p>Rates are then negotiated on the basis of these target ranges, rather than a set fee schedule. In general, the majority of rates negotiated with freestanding facilities fall within a targeted rate range differential to the average as a whole.</p>	<p><b>As Written:</b> Aetna maintains uniform reimbursement practices that are equally applicable to MH/SUD and medical/surgical. See Appendix 1 for a listing of core policies.</p> <p><b>In Operation:</b> Aetna monitors the application of this NQTL through:</p> <ul style="list-style-type: none"> <li>Mental Health Parity (MHP) Task Force: Multi-disciplinary team that meets monthly to establish parity compliance protocols; clarify interpretation of parity regulations, FAQs, and related requirements; and to respond to internal and external parity questions and requests. Subgroups comprised of both Behavioral Health and Medical Surgical Clinical and other administrative personnel meet more frequently and as needed to ensure compliance in specific policy and operational areas, i.e.) network management, clinical management by level of care.</li> </ul>

Non-Participating Facility Reimbursement NQTL

Allowable amount is the amount of an out-of-network provider’s charge that is eligible for coverage. The allowable amount depends on the geographic area where members get the service or supply.

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered out of network	Applies to all M/S benefits delivered out of network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Reasonable and Customary rates benchmarked from reimbursement rate indices</li> </ul>	<ul style="list-style-type: none"> <li>Rate hierarchy (i.e. a preset algorithm that generates the rate that will be paid based on certain factors)</li> <li>Market analysis when rate hierarchy is not applicable</li> <li>Final rate negotiated as part of the rate hierarchy process</li> </ul>	<p>Aetna compensates nonparticipating providers based on member’s plan and benefit level subject to the lesser of either the billed charges or the allowable amount determined by a standard rate hierarchy that is the same for both MH/SUD and M/S.</p> <p>For Aetna’s standard fully insured plans, Aetna’s claim payment system follows these steps in attempting to price non-participating claims.</p> <p>If one step is unsuccessful, we move on to the next until the claim is successfully priced. These steps may vary by type of non-participating claim.</p> <p>First tier of hierarchy includes Single-case contracting (pre-service negotiations), second tier includes availability of a National Advantage Program (NAP) rate, third tier includes the Plan rate, fourth tier includes facility charge review, fifth tier includes ad hoc NAP post-service negotiations, and sixth tier involves non-par reasonable/default rate</p> <p>Where reimbursement is based on Aetna’s OON schedules then:</p> <ul style="list-style-type: none"> <li>MD’s (MH/SUD and medical/surgical) &amp; Clinical Psychologists receive 100% of the rate</li> <li>All other provider types receives 85% of the new rate</li> </ul>	<p><b>As Written:</b> Aetna maintains uniform reimbursement practices that are equally applicable to MH/SUD and medical/surgical. See Appendix 1 for a listing of core policies.</p> <p><b>In Operation:</b> Aetna monitors the application of this NQTL through several initiatives:</p> <ul style="list-style-type: none"> <li>Mental Health Parity (MHP) Task Force: Multi-disciplinary team that meets bi- weekly to establish parity compliance protocols; clarify interpretation of parity regulations, FAQs, and related requirements; and to respond to internal and external parity questions and requests. Subgroups comprised of both Behavioral Health and Medical Surgical Clinical and other administrative personnel meet more frequently and as needed to ensure compliance in specific policy and operational areas, i.e.) network management, clinical management by level of care</li> </ul>

Network Adequacy NQTL

Aetna maintains sufficient numbers and types of primary care, behavioral health and specialty care practitioners in its network. Aetna maintains an adequate network of primary care, behavioral healthcare and specialty care practitioners (SCP) and monitors how effectively this network meets the needs and preferences of its membership. Aetna establishes mechanisms to provide access to appointments for primary care services, behavioral healthcare services and specialty care services. Aetna provides and maintains appropriate access to primary care services, behavioral healthcare services and specialty care services.

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered in-network	Applies to all M/S benefits delivered in-network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Applicable state law, federal law, and accreditation network adequacy requirements</li> </ul>	<ul style="list-style-type: none"> <li>Aetna’s standards approved by NCQA in accrediting Aetna. Aetna has NCQA accreditation as a Health Plan and a Managed Behavioral Healthcare Organization (“Aetna’s NCQA Standards”)</li> <li>Network adequacy indicators are based on NCQAs NET 1 (AVAILABILITY OF PRACTITIONERS) and NET 2 (ACCESSIBILITY OF SERVICES)</li> <li>State specific Network Adequacy as applicable</li> </ul>	<p>The same standards are used to define and monitor minimum requirements for network composition, ensure compliance with applicable state and federal regulatory standards, and to ensure compliance with applicable accreditations standards for both M/S and MH/SUD.</p>	<p><b>As Written:</b> Aetna maintains uniform network adequacy practices that are equally applicable to MH/SUD and medical/surgical. See Appendix 1 for a listing of core policies.</p> <p><b>In operation:</b> Aetna monitors the application of this NQTL through several initiatives:</p> <ul style="list-style-type: none"> <li>Oversight of network adequacy reporting by the National Quality Oversight Committee NQOC. <ul style="list-style-type: none"> <li>A qualitative and quantitative analysis by product/product line is performed using network adequacy data which includes member complaints/grievances and appeals, accessibility, availability, out of network requests, and member experience data (CAHPS or member experience survey).</li> </ul> </li> <li>Network adequacy complaints/grievances and appeals at or in excess of .01 per thousand member months will trigger an additional review. The rate per thousand member months shall be calculated as follows: [# of complaints or appeals]/(monthly total for 12 months of membership/1000)]</li> <li>Out-Of-Network requests for and utilization services will be reported at the product line-level per thousand members. The rate per thousand members shall be calculated as follows: [# of Out-of-Network requests]/1,000 enrollees] (membership/1000).</li> </ul>

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
					<p>The results of the above analysis will be reviewed in conjunction with the findings of the network availability and accessibility analyses to identify and prioritize opportunities for improvement. One improvement for non-behavioral health and one for behavioral health will be implemented.</p>

Provider Admission Standards NQTL: Outpatient group and individual providers

Credentialing is a process by which a health care organization reviews and evaluates qualifications of licensed independent practitioners to provide services to its members/enrollees. Eligibility is determined by the extent to which applicants meet defined requirements for education, licensure, professional standing, service availability and accessibility, as well as for conformity to the organization’s utilization and quality management requirements.

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered in-network	Applies to all M/S benefits delivered in-network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Applicable state law, federal law, and accreditation practice requirements</li> </ul>	<ul style="list-style-type: none"> <li>Aetna’s NCQA Standards</li> <li>Verification from Aetna, National Committee for Quality Assurance (NCQA) Standards and Guidelines for the Accreditation of Health Plans and CMS approved primary sources. Aetna utilizes the Council for Affordable Quality Healthcare (CAQH) data warehouse.</li> </ul>	The provider admission standards and process are the same between M/S and MH/SUD providers. The variances will only be dependent upon licensing board requirements	<p><b>As Written</b> Aetna maintains one set of credentialing policies that are equally applicable to MH/SUD and medical/surgical. See Appendix 1 for a listing of core policies.</p> <p><b>In Operation:</b> Aetna monitors the application this NQTL through several initiatives:</p> <ul style="list-style-type: none"> <li>Mental Health Parity (MHP) Task Force: Multi-disciplinary team that meets monthly to establish parity compliance protocols; clarify interpretation of parity regulations, FAQs, and related requirements; and to respond to internal and external parity questions and requests. Subgroups comprised of both Behavioral Health and Medical Surgical Clinical and other administrative personnel meet more frequently and as needed to ensure compliance in specific policy and operational areas, i.e.) network management, clinical management by level of care.</li> <li>Credentialing rate and turnaround time reports (refer to Appendix 8)</li> </ul>

Provider Admission Standards NQTL: Facility and Facility-Based Practitioners

Credentialing is a process by which a health care organization reviews and evaluates qualifications of licensed independent practitioners to provide services to its members/enrollees. Eligibility is determined by the extent to which applicants meet defined requirements for education, licensure, professional standing, service availability and accessibility, as well as for conformity to the organization’s utilization and quality management requirements.

NQTL applies to MH/SUD	NQTL applies to M/S	Factors: <i>Factors used in the development of the limitation</i>	Sources: <i>Processes, Strategies, and evidentiary standards</i>	Comparability Analysis: <i>Results of the comparison of MH/SUD and Medical/Surgical</i>	Stringency: <i>Evidence to establish that the limitation is applied no more stringently, as written and in operation, to MH/SUD benefits than to M/S benefits</i>
Applies to all MH/SUD benefits delivered in-network	Applies to all M/S benefits delivered in-network	<p>Note: <b>All factors are the same for medical/surgical and MH/SUD</b></p> <ul style="list-style-type: none"> <li>Applicable state law, federal law, and accreditation practice requirements</li> </ul>	<ul style="list-style-type: none"> <li>Aetna’s NCQA Standards</li> <li>Facility qualifications are reviewed to ensure facility meets Aetna’s established requirements for organizational credentialing, including state licensing board, operating/certificate of occupancy, accreditation entity.</li> </ul>	The provider admission standards and credentialing process are the same between M/S and MH/SUD providers. The variances will only be dependent upon licensing and/or accreditation requirements per facility type.	<p><b>As Written:</b> Aetna maintains one set of credentialing policies that are equally applicable to MH/SUD and medical/surgical. \*The data above is refreshed second quarter of every year for the most recently closed calendar year. This data represents all fully insured commercial business.

APPENDIX 8

Outpatient Services

**Please note:**

- *The responses below included data for initial applications. The below is based on National level data.*
- *Aetna does not track credentialed providers by Inpatient vs. Outpatient. A provider may be a provider that practices in a facility (i.e., surgery center), but also sees patients at their office. The outpatient data below reflects credentialing information/data for providers who are office based.*
- Please provide a comparison of the application process for MH/SUD and MS providers, including:
  - the number of applications received, accepted or denied/withdrawn.

Applications	MH/SUD	MS
Received	<b>29,510</b>	<b>31,728</b>
Accepted	<b>29,491</b>	<b>31,696</b>
Denied/Withdrawn	<b>19</b>	<b>32</b>
% Approved	<b>99.9%</b>	<b>99.9%</b>

- The average number of days from receipt of a completed credentialing application to approval to be contracted (2021).

MS Providers: 31 Days      MH/SUD Providers: 21 Days

- The number of times additional documentation has been requested to establish credentialing standards are met.

Aetna is unable to report the number of times additional documentation may be requested to establish credentialing standards are met. Aetna will follow with providers as part of the credentialing process as needed. Examples would include, but not be limited to incomplete applications, missing information (i.e., licensure, liability insurance, etc.). During 2021, there were also providers that were not able to provide information for recredentialing due to office or state closure related to Covid-19.

APPENDIX 9

Inpatient Services

**Please note:**

- **The responses below included data for initial applications. The below is based on National level data.**
- **Aetna does not track credentialed providers by Inpatient vs. Outpatient. A provider may be a provider that practices in a facility (i.e., surgery center), but also sees patients at their office. The inpatient data below reflects Facility credentialing information/data.**
- Please provide a comparison of the application process for MH/SUD and MS providers, including:
  - The number of applications received; accepted, denied/withdrawn;

Applications	MH/SUD	MS
Received	<b>1060</b>	<b>2607</b>
Accepted	<b>1011</b>	<b>2474</b>
Denied/Withdrawn	<b>49</b>	<b>133</b>
% Approved	<b>95.3%</b>	<b>94.8%</b>

- The length of time to process the application;

Aetna does not produce a report that shows the length of time to process a credentialing application for facilities broken out by MH/SUD vs MS. Aetna’s initial credentialing turnaround time for all facilities is an average of 18 calendar days from receipt of a completed credentialing application to approval to be contracted.

- The number of times additional documentation has been requested to establish credentialing standards are met.

Aetna is unable to report the number of times additional documentation may be requested to establish credentialing standards are met. Aetna will follow with facilities as part

of the credentialing process as needed. Examples would include, but not be limited to incomplete applications, missing information (i.e., licensure, liability insurance, etc.). During 2021, there were also facilities that were not able to provide information for recredentialing due to facility or state closure related to Covid-19.
